BASIC-ABSTRACT:

Non-corrosive, flame-proof structural panels for use in building of walls, roofs etc. are prepd. by applying an adhesive (2) to one or both sides of a base sheet (1) made of metal or fibre-board which has been given anti-corrosive treatment. A fire resistant layer (3) is formed by applying to 2, electrostatically charged short fibres of asbestos or glass. A further layer of adhesive (4) is applied, and a uniform coating (5) of electrostatically-charged inorganic, pref. coloured ceramic or metallic powder is spread over (4), and dried. A durable, resinous transparent top coat (6) such as an acrylic resin is finally applied.
